

BioRemid2019

Dear colleague,

The 2nd International Meeting on New Strategies in Bioremediation Processes - **BioRemid2019** will take place in Porto (Portugal) on the 24th and 25th of October, 2019 (<http://conference.mercatura.pt/events/bioremid2019/>). The objective of this meeting is to bring together scientists and industry professionals in a friendly environment to share the latest developments and innovations in the area of Bioremediation.

This second edition will be hosted by the Faculty of Engineering of the University of Porto (FEUP), with the support of Research Units of the Portuguese Foundation for Science and Technology (FCT). We are currently inviting contributions in the following main topics:

Identification and monitoring of pollutants

Degradation of contaminants of emerging concern

Bioremediation of priority pollutants

New technologies in biotreatment

New biodegraders and consortium-based strategies

Anthropogenic impacts on the microbial communities

Mathematical models for bioremediation processes

Waste recovery

In addition to the main conference, delegates will have the opportunity to enjoy the city of Porto, a UNESCO World Heritage Site since 1996 and Lonely Planet's Best Travel Destination in Europe in 2013, several times designated as the "Best European Destination". Its iron bridges, narrow roads, traditional buildings, delicious food, warm-welcoming locals... and Port Wine cellars will be the perfect complement to a high quality scientific event.

Please join us in Porto in October for an amazing BioRemid2019!

On behalf of the Organizing Committee,
