Scope of the Symposium

Professor Fernando Ramôa Ribeiro, former head of CRERG group (IST, Lisbon), passed away on the 29th August 2011. In recognition of his great contribution to the scientific and academic communities, namely in the field of Heterogeneous Catalysis and Zeolites, his collaborators and coworkers have decided to organize a scientific symposium in his honour, to be held at Instituto Superior Técnico (Lisbon) on October 8th - 9th, 2012

The symposium under the theme “**Catalysis: From the Active Site to the Process**” will cover the following topics:

1. Catalysts Preparation and Characterization
2. Catalysis in Refining and Petrochemicals
3. Clean Energy and Pollution Control
4. Kinetic Modeling of Catalytic Processes

The Symposium will be structured in four sessions and will include invited lectures (4 plenaries, 8 keynotes and 16 orals) together with one posters session opened to abstracts submission. The authors of plenary, keynote lectures, orals and 3 selected poster communications will be invited to contribute with a full manuscript to be published in a special issue of an international journal.
