

Encontros com a ciência

Programação 2014

Departamento de Engenharia Química, FCTUC, Pólo II
Anfiteatro Nobre, piso -2, 14h15 - 15h15

Data	Palestrante	Título
9 Abr	Ana Sofia Fajardo	Electrocoagulation: a new approach to treat wastewaters
7 Mai	Sofia Marceneiro	Effects of ionic liquids on the rheological and thermo-mechanical properties of PVC-based formulations
4 Jun	Marco Reis	Semi-empirical model building: should we go univariate, multivariate or ... intermediate?
2 Jul	André Ferreira	Molecular dynamics studies on peptide functionalized metal-nanoparticles
10 Set	Licínio Ferreira	Valorization of industrial wastes for the separation and recovery of metals
8 Out	Graça Rasteiro e António Correia	Carbon nanotubes for application in soil stabilization
5 Nov	Inês Vilarinho	Rigorous Dynamic Modelling of the NO _x Absorption Process
3 Dez	Hajar Maleki	Development of lightweight polymer-reinforced silica aerogels with improved mechanical and thermal insulation properties for space applications

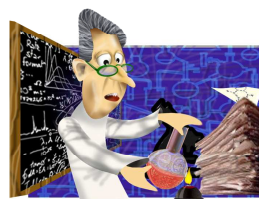

cartoon chemical engineer

What society thinks we do

What the Government
thinks we do

What we actually do

Chemical Process Engineering and Forest Products Research Center – CIEPQPF
Department of Chemical Engineering University of Coimbra
